

Bringing digital adventure to young learner exams

Why choose Cambridge English Qualifications Digital for young learners?

An exciting introduction

Young learners take their first steps in English on digital fantasy islands. Aligned to the CEFR, Pre A1 Starters Digital and A1 Movers Digital build children's confidence and provide clear milestones, goals and next steps.

A rewarding adventure

Young learners each create their own avatar, which they customise with rewards after every task. This gives all candidates a sense of progress, encouraging a positive mindset towards learning and assessment.

Natural for the new generation

The digital tests focus on the same skills to the same CEFR levels as our paper-based tests. Some task types have been adapted for the digital format, while others are new to reflect the digital world young learners are growing up in.

An experience built on expertise

The digital tests deliver a new, fun, interactive testing experience. Decades of expertise in language testing for young learners, combined with the opportunities presented by technology, makes a world-leading adventure.

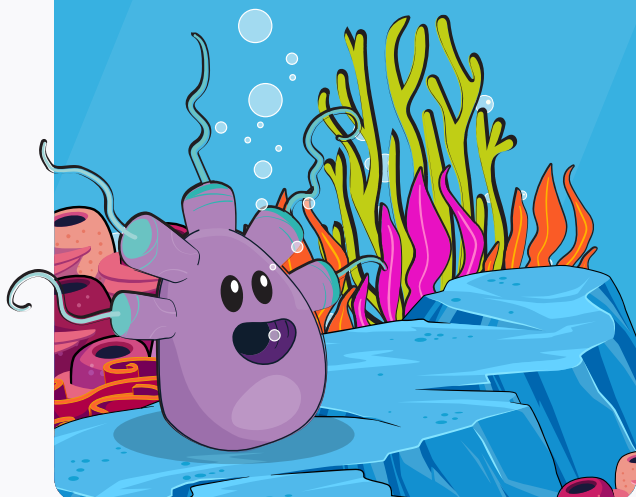

A motivating start to the journey

There's no pass or fail and results are available quickly, showing candidates' performance in each skill, strengths and areas for improvement. Every child receives a certificate and is celebrated, so they can look forward to their next step.

Pre A1 Starters Digital

The first level is set under the sea on a turtle island! It represents Pre A1 on the CEFR and introduces children to everyday written and spoken English.

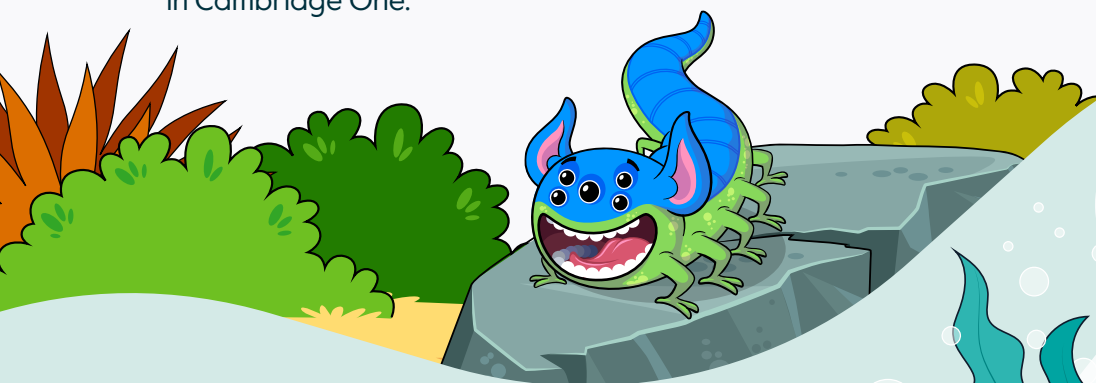

A1 Movers Digital

The second level is set on a dinosaur island! It represents A1 on the CEFR and progresses to simple conversational English.

Get the most out of every moment of learning with preparation resources

On the way to exam day there is plenty of material to support you and your learners. The resources you may be familiar with for the paper-based tests will help develop their skills, alongside new free material to familiarise them with the digital format, such as sample tests, video tutorials and practice activities in Cambridge One.
